COMPARISON OF OPTIONS AT

FARIES PARKWAY INTERSECTION

The efficiency of the intersection at Brush College Road and Faries Parkway can be evaluated by considering the average travel time through the intersection for a vehicle during the peak evening travel period. Note that the travel time is an average, since some motorists may encounter a stop light or yield condition and others may not.

Option #1 – Ramp with Signals

Travel Time = 1 minute 12 seconds

Option #2 – Ramp with Roundabouts

Travel Time = 1 minute 4 seconds

Both options provide reasonable, and nearly equal, travel times. Please provide your feedback on the open house comment form.
